PROFILE SUMMARY

Highly motivated final-year Telecommunication Engineering student at Politeknik Negeri Jakarta with hands-on project experience in Internet of Things (IoT), Embedded Systems, and Computer Vision. Proven ability to design and implement hardware-software integrations, ranging from drone-based monitoring systems to web-integrated smart access solutions. Adept in C/C++, Python, and networking configurations, backed by MTCNA and AWS Cloud certifications. Eager to leverage a strong technical foundation and problem-solving skills to contribute effectively to a dynamic engineering or IT team.

PROJECT EXPERIENCE

High School LAN Network Implementation – Bekasi, Indonesia

Network Engineer

Aug 2022 – Nov 2022

- Installed physical local area network infrastructure, including cable assembly and TP-Link router hardware configuration, to ensure the stability of the school's system connectivity.

ESP32-based BLE Keyless Motor Starter Prototype – Bekasi, Indonesia

Project Developer Team

Oct 2022 – Nov 2022

- Developed an ESP32-based keyless motor starter hardware circuit by programming Bluetooth Low Energy (BLE) control logic using C/C++ to enhance vehicle physical security.

Web-Integrated RFID Attendance System (ESP8266) – Bekasi, Indonesia

Project Developer

Oct 2022 – Nov 2022

- Assembled and soldered RFID reader hardware on an ESP8266 utilizing C/C++ programming for physical authentication, integrating real-time attendance data transmission to the school website.

Student Council Authentication-based Digital Door Lock – Bekasi, Indonesia

Project Developer

Aug 2022 – Oct 2022

- Designed and soldered a microcontroller-based automated door lock system circuit, writing C/C++ code to securely manage physical access restriction logic.

SMAPAR (Smart Parking System) – Depok, Indonesia

IoT & Back-End Developer

Jun 2024 – Jan 2025

- Designed parking sensor hardware and programmed microcontrollers using C/C++ for physical vehicle detection, integrating telemetry data transmission into a Flask web backend system.

Drone-based Agricultural Monitoring System – Depok, Indonesia

Hardware Engineer / Project Developer

Feb 2026 – Jul 2026

- Optimized the drone's monitoring system by leveraging its built-in camera for automated leaf detection, and designed custom 3D payload structures using SketchUp and Cura to support the drone's physical infrastructure.

ORGANIZATIONAL EXPERIENCE

Staff of Consumption Fund Division - Olahraga Elektro 2023

Apr 2024 – Jul 2024

Vice Chairman - Computer Student Club PNJ

Mar 2025 – Mar 2026

Head of IoT Division -Telextion PNJ

Mar 2025 – Feb 2026

Staff of Education & Culture - Psychorobotic Pnj

Mar 2025 – Jan 2026

EDUCATION

Politeknik Negeri Jakarta – Depok, Indonesia

Sep 2023 – Sep 2026

Diploma III, Telecommunication Engineering

SMK Taman Harapan – Bekasi, Indonesia

Jun 2020 – Jun 2023

Computer and Network Engineering

SKILLS & CERTIFICATIONS

Technical Skills: C/C++, Python, SQL, HTML/CSS, MATLAB, SketchUp, 3D Design, Hardware Soldering, Embedded Systems (ESP32/ESP8266/Arduino), Computer Vision.

Languages: Fluent in Bahasa Indonesia, Beginner in English.

Certifications: Certified MTCNA by Mikrotik, Cloud Practitioner Essentials (AWS) by Dicoding, Basic DevOps by Dicoding, Basic JavaScript Programming by Dicoding.

Training: Basic Cisco Training by ID-Networkers, Basic Computer Networking by ID-Networkers, Basic Mikrotik by ID-Networkers.

Link Certifications & Training: [Certified MTCNA by Mikrotik](#), [Belajar Dasar-Dasar DevOps by Dicoding](#), [Belajar Dasar Pemrograman JavaScript by Dicoding](#), [Cloud Practitioner Essentials \(Belajar Dasar AWS Cloud\) by Dicoding](#), [Training Cisco Dasar by ID-Networkers](#), [Training Jaringan Komputer Dasar by ID-Networkers](#), [Training Mikrotik Dasar by ID-Networkers](#).
